

Industrial Technology Transformation Index (ITTI): *Empowering Manufacturers in Digital Transformation*

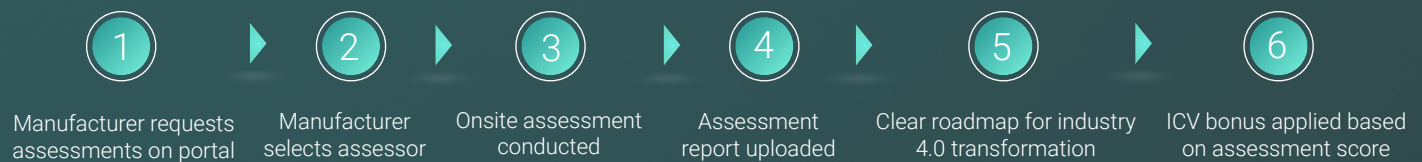

About the Industrial Technology Transformation Index (ITTI)

ITTI is a **comprehensive tool for the manufacturing industry to measure their plant's digital and sustainability maturity**, and **provide a customized roadmap** for smarter, more sustainable production.

Designed in line with manufacturer's value chain, ITTI helps manufacturers understand their current level of digital and sustainability readiness, and receive recommendations for improvement. It **raises awareness about** the integration of **Industry 4.0 applications and sustainability** within manufacturing.

ITTI is based on a one-day on-site assessment, followed by the development of a recommendations report for improvements generating the highest business impact.

Join us on this journey and take your factory to the next level with ITTI.

Why should you conduct a digital maturity assessment using ITTI?

Holistic understanding

of your current digital and sustainability maturity in comparison with best in class

Insightful Tool

to make evidence-based decisions and build awareness on I4.0 concepts within your organization

Clear Recommendations

to unlock maximum value and efficiency for your maturity state

Secure Opportunities

to improve your ICV score and unlock access to public contracts

Seamless Deployment

without the need to share any confidential information

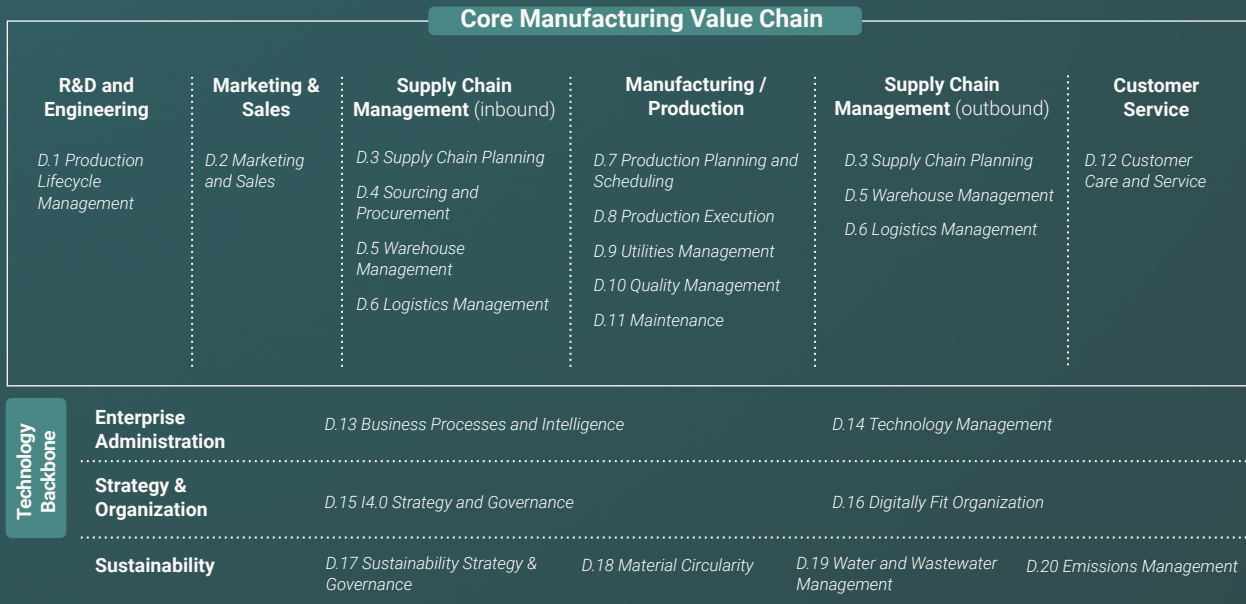

Fast Track

to stay ahead of the curve in the digital age

Industrial Technology Transformation Index (ITTI): Empowering Manufacturers in Digital Transformation

What does the ITTI assessment look like?

The assessment evaluates a company's technology adoption on **20 dimensions across the value chain**, from 0 (ad hoc basis) to 5 (self-optimizing).

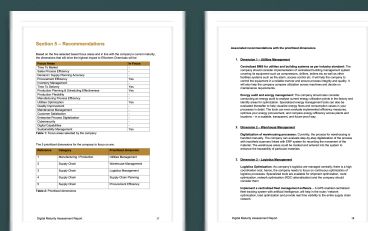

Companies receive a 1-day assessment with a report of current state and 5 recommendations per their prioritized dimensions, to guide their journey forward.

Assessment Results

- Digital maturity assessment conducted in 1 day
- Awareness on I4.0 concepts and technologies
- Results with company ambitions and best-in-class benchmarks

Recommendations

- 5 prioritized dimensions that deliver highest impact
- Detailed recommendations to support technology adoption
- Total company score to facilitate linkage with schemes
